MAIN PROJECT

Topic:MountainFresh Products-Organic Product Management system

Tania Margret Sebastian

MCA B 33

Abstract

Hill produces an important group of commodities and plays a important role in the Indian economy. The main objective of the Mountain Fresh Products-Organic Product Management System is to manage the details of the farm, and hill produce. The admin manages the website. The registered products are developed in admin own plantation and some other small-scale farmers plantations. Admin register the hill produce, seeds and price. The customer and farmer can register on the site. Then the user can log in the website, views the entire product,its details and farmer login the site and add their products . Then the user can search the products, add the products to the cart and buy the products. After getting the order farm employess despatch the products through the parcel services. Here all the sales are final, no refunds and no returns. After getting the product, user can send their feedback to the admin. The administrator is guaranteed the access to farmer. The purpose of the project is to build an application program to reduce the manual work for managing the farm, hill Produce, cost and its help the farmers to sale their products.
